Gov't provides investment opportunities in mineral, petroleum sector — Zawati

The Ministry of Energy and Mineral Resources, in cooperation with the Jordan Investment Commission (JIC), on Wednesday launched a set of investment opportunities in the mineral and petroleum resources sector in the Kingdom. The ministry has been working on identifying potential investment areas in the petroleum, oil shale and mineral resources, according to Minister of Energy and Mineral Resources Hala Zawati. The mining sector in its two parts — strategic and industrial minerals — accounted for 7.6 per cent of GDP and 19.7 per cent of the total national exports in 2018, Zawati said during a joint press conference with Chairman of the Jordan Investment Commission Khaled Wazani. The minister pointed out that the focus is on strategic minerals such as gold, copper, zircon and rare earth elements, as well as industrial minerals and rocks such as silica sands, basalt, chalk, pure limestone, dolomite, kaolin and feldspar.

Only 26% of 2020 Jordan Response Plan financed — Planning Ministry

Funding for the Jordan Response Plan (JRP), the national response to the Syrian refugee crisis, stood at \$597 million in the first eight months of 2020, leaving a massive deficit of \$1.652 billion, according to the Ministry of Planning and International Cooperation. The ministry's figures show that only 25 per cent or \$597 million of the plan's 2020 funding needs, \$2.249 billion, has been secured since the beginning of the current year, the Jordan News Agency, Petra, reported. Of the amount secured, \$124 million went to supporting refugees, \$122 million for host communities and \$350 million was channelled to support the Treasury while no funding was made available to institutional capacity-building projects, the data reveal. The figures show that the US was the top donor of this year's plan at \$367.7 million followed by Germany with a grant estimated at \$67.5 million. The government approved the Jordan Response Plan to the Syrian crisis for the years 2020-2022, with a total funding of about \$6.6 billion.
