

U Capital Weekly Report

Market Review & Outlook:

Volatile oil prices and Coronavirus fears takes MSM down significantly

MSM30 Index closed the week down by 9.11% w-o-w, largely on account of fears of increase in Coronavirus cases and confrontation between oil producers.

All sub-indices closed down, led by the Financial Index, which closed down by 8.67% w-o-w followed by the Services Index which closed down by 7.23% w-o-w and the Industrial Index which closed down by 7.20% w-o-w. MSM Shariah Index closed down by 5.99% w-o-w.

Units of Aman Real Estate Investment Fund — the first Real Estate Investment Fund (REIF / REIT) in the Sultanate — will be listed on the MSM on Sunday, March 15. Subscriptions into the Fund had closed on March 1, 2020 after two sets of extensions to allow for customers to consider investing in the maiden REIT. Subscriptions covered 50% of the 100mn units offered for public subscription at a total value of OMR 10mn. Aman will distribute 90% of the net income to investors holding units in the fund at 7% dividend in two semi-annual payments. Aman offered 25% of the assets of Sandan Industrial Estate at Halban, which is owned by Sandan Development. The company agreed to the lease of the properties for five years.

	Year 1	Year 2	Year 3
Expected Net Profit (OMR mn)	1.40	1.41	2.45
Dividend ratio to capital - %	7.03%	7.03%	7.03%
Return per Unit - %	6.70%	6.70%	6.81%

Central Bank Oman approved Sohar International Bank (BKSB)'s cash dividend of OMR 0.003 per share and stock dividend of 3%, maintaining the total pay-out as proposed by the Board earlier while changing the composition of the dividend (3% Cash and 3% Stock from Board's proposal of 6% cash). The proposal is subject to shareholder approval at the AGM.

Bank Dhofar's dividend proposal for 2019 has been reduced to 3bzs cash per share from an earlier 7bzs per share, subject to shareholder approval at the AGM. We believe that the CBO has approved a smaller dividend payment in order to let the bank maintain its capital adequacy ratios. As at 2019-end, the bank's Common Equity Tier 1 stood at 12.59%, Tier 1 Capital Adequacy Ratio stood at 16.4% and Total CAR at 17.86%, which are above the minimum regulatory requirements but with a higher than sector-average NPL ratio (at 4.75% of gross loans) and much lower than sector-average provision cover (at 78%), it is prudent for the bank to reduce pay-out as of now in order to shore up capital for any future rise in delinquencies.

National Biscuits Industries announced that it was exposed to an online fraud when a transaction of Euros 169,799 (OMR 70,090) was carried out from its accounts. The Company has initiated legal measures to recover the above amount. Meanwhile the company has strengthened its internal control system including its IT control framework to avoid recurrence and minimise risks.

Amongst the vision of the Oman government to diversify their economy into logistic sector, Oman Shipping is taking the lead and is expanding its operations. The Company confirmed the acquisition of two modern Ultramax dry bulk vessels, SBI Taurus and TR Omaha. The new ships due for delivery in April and May 2020 will join OSC's fleet of over 50 world-class vessels. The announcement is in line with OSC's business plan and will add to the company's dry cargo capacity meeting increasing customer demand and complementing the existing vessel portfolio to further contribute to the development of the local mining industry.

Oman investor friendly laws continue to bring in results. Sohar Port & Free Zone Authority announced that it has received investment of OMR 10.4bn till date. The number of vessels that were called into the port reached nearly 3,200 vessels, 900 of which were in the last quarter of the year. During 2019, dry bulk was valued at over 36 million tons, liquid bulk at over 15 million tons and breakbulk over 1

million tons. There are also plans in the pipeline for the expansion of Sohar Freezone, which in turn, will increase its capacity to bring in prospective investors.

Moody's Investors Service, downgraded the long-term issuer and senior unsecured ratings of the Government of Oman to Ba2 from Ba1 and changed the outlook to stable. The stable outlook reflects Moody's assessment that Oman's credit metrics are resilient to moderately negative fiscal and oil price shocks at the Ba2 rating level. The outlook also takes into account balanced risks around the implementation of the fiscal adjustment program.

Moody's also downgraded the long-term local and foreign currency deposit ratings of five Omani banks: Bank Muscat SAOG (Bank Muscat), Bank Dhofar SAOG (Bank Dhofar), National Bank of Oman SAOG (NBO), Sohar International Bank SAOG (Sohar International) and Oman Arab Bank (SAOC) (OAB). At the same time, Moody's affirmed the long-term local currency deposit ratings and downgraded the long-term foreign currency deposit rating of two banks: HSBC Bank Oman SAOG (HBON) and Bank Nizwa SAOG (Bank Nizwa).

Reuters reported that Oman is in talks with banks for around USD 2bn in loans. Oman had projected a deficit of OMR 2.5bn (USD 6.5bn), or 8% of GDP for 2020 and planned to cover some 80% of that amount through foreign and domestic borrowing.

Small and Medium Enterprises in Oman continue to grow supported by government friendly and supportive laws for the entrepreneurs in Oman. SMEs in Oman have grown from 32,441 in December 2018 to 42,698 at the end of 2019, growth of 14.5%. During 2019 around 5409 new SME were started. Of the total SMES, majority are located in Muscat Governorate at 33%, followed by 16% in Al Batinah North and 13% in Ad Dakhliyah. Of the total number of SMEs, 6% are of Medium size in nature while the remaining 94% are Small.

SMEs in Oman

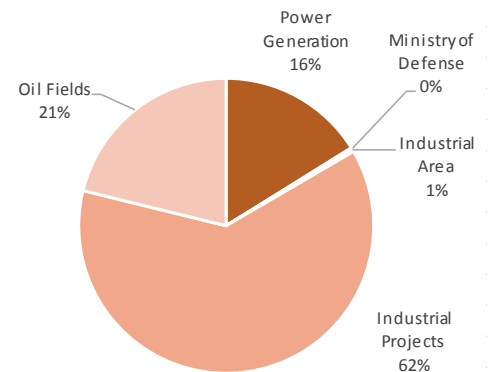

Source: NCSI

Oman's import & local production of natural gas during 2019 amounted to 46,190 mncm compared to 45,721mncm during 2018, growth of a percent. In terms of use, power generation, industrial projects and oil fields requirement was at 7453mncm, 28751mncm and 9776mncm, respectively.

Regionally, all GCC indices closed down by led by Dubai and Abu Dhabi.

Saudi Arabia and other big oil exporters that make up OPEC had agreed on 5th March to further cut their oil output by 1.5 million barrels a day to December 2020, in an attempt to shore up the price of oil as the new coronavirus wreaks havoc on the global economy. But that agreement was conditional on the support of Russia which ultimately balked, ending the two-day OPEC meeting in Vienna with no new agreement and sending crude prices into freefall. The fall was further aggravated by aggressive increase in oil production by Saudi Arabia and UAE. Saudi Aramco announced that it received a directive from the Ministry of Energy to increase its maximum sustainable capacity (MSC) from 12 mn barrels per day (mn bpd) to 13mn bpd. UAE's ADNOC announced that it plans to increase its oil production capacity to 4mn

Natural Gas Use - Composition %

Source: NCSI

bpd by the end of 2020 and 5mn bpd by 2030 after new oil and gas finds. We believe, if oil will continue to sustain at current levels, the shale oil production which amounts to 8-9 mn bpd will be impacted immensely ultimately aiding in oil price recovery.

Oil Prices

Bank of England has slashed the base rate by 0.5% in emergency measures to tackle the impact the coronavirus outbreak is having on the economy. It means the rate used by banks and lenders to set their own interest rates has dramatically dropped from 0.75% to 0.25%. The Monetary Policy Committee (MPC) voted unanimously to reduce the rate for the first time since August 2016.

Bank of England Rate (%)

Source: Bloomberg

Recommendation:

The week goes into history with events such as an abrupt end to OPEC+ initiated voluntary production cuts leading to a significant drop in oil prices along with many countries announcing lockdowns and quarantines amid pandemic fears.

Weakening of oil prices has not only compounded the coronavirus fears, but has also set in motion another wave of stock market collapse. Investors are wary of not only weakening local economies but global recession fears as well. During the week, global credit markets also came under renewed strain.

In light of recent events, we advise investors to invest in defensive and high dividend yielding companies in order to safeguard against any unforeseen losses. Furthermore, it would be advisable to analyze investment opportunities in the light of the supply chain collapse some companies are just beginning to comprehend and talk about.
